Lone Jespersen, Ph.D., Principal and Founder, Cultivate SA

published author, speaker, and the principal and founder of Cultivate SA

Lone chaired the Global Food Safety Initiative

Lone holds a Ph.D. in Culture Enabled Food Safety from the University of Guelph

Lone Jespersen is published author, speaker, and the principal and founder of Cultivate SA, a Swiss-based organization dedicated to help organizations in the global supply chain make safe, great tasting food through cultural effectiveness.

Cultivate combines deep research and practical expertise to innovate cultures. They have assessed food safety culture in more than 100 companies located around the world and work with those company to implement cultural plans to drive change through a phased approach. They have also developed two technology platforms – Insights and Pulse - that uses AI machine-learning to help organizations improve food safety.

Lone chaired the Global Food Safety Initiative (GFSI) technical working group “A Culture of Food Safety”, chaired, the International Association of Food Protection (IAFP) professional development group “Food Safety Culture”, and currently the technical author on the BSI PAS320 “Practical Guide to Food Safety Culture.” Lone holds a Ph.D. in Culture Enabled Food Safety from the University of Guelph, Canada and a Master in Mechanical Engineering from Syd Dansk University, Denmark.
